Session Two

16.30 – 16.55 **E-Call: One Year On**

Gilles Carabin, DG Mobility and Transport, European Commission

16.55 – 17.20 **Rescue Information: ISO 17840**

Tom Van Esbroeck, CTIF, Belgium

17.20 – 17.45 **Extrication in Trauma: New Research**

Mike Dayson, National Fire Chiefs' Council, UK

Close

About the REVIVE Project

Improvements in emergency response can help prevent deaths and life-changing injuries in road collisions. However, emergency response has not been getting a fair share of attention in terms of research, best practice exchange and measures in the European Union. The aim of the REVIVE project is to map Emergency Medical Service (EMS) and Fire and Rescue Service (FRS) practices in the EU28 and raise the profile of both EMS and FRS on the national and European political agendas.

The REVIVE project aims at improving post-crash care provided by EMS and FRS in order to mitigate the consequences of road collisions. One of the key outcomes of the project is to have established an international network of experts, researchers and practitioners in the field of post-collision care and emergency response. Lastly, the Revive project has contributed to promoting the need for EU-wide action on tackling serious road traffic injuries.

TOYOTA

The REVIVE project receives financial support from Toyota Motor Europe.
